

DAMEC

HONING COURSE PROGRAM

Course for ONE/TWO PERSONS, 16 hours in total, divided into two parts:

THEORY

- Basic honing concepts;
- Selection of the correct abrasive;
- Selection of machine parameter settings;
- Discussion on issues encountered during the processing cycle and identification of solutions;
- Operator verification test;
- Explanation of drawing symbols.

PRACTICE

- Selection of abrasives and tools to use in different situations;
- Preparation of the work through the assembly of tools and abrasives;
- Alignment of the tool in the machine;
- Machine settings for the work cycle;
- Resolution of issues encountered during processing;
- Operator verification test.

Please note that at the end of the two-day course, a certificate of participation and the relevant course documentation will be issued for each operator.
